

Julia Nething

Orlando, Florida • cjnething@gmail.com • 407-982-6132 • [linkedin.com/in/nething](https://www.linkedin.com/in/nething) • github.com/cjnething

Technical Skills

Languages: TypeScript, JavaScript, Python, Java

Technologies: React, Node.js, PostgreSQL, Django, Flask, AWS (Lambda, SQS, SNS), Kafka, Pub/Sub, Docker, REST APIs, CI/CD

Work Experience

Staff Software Engineer • Thorn • Remote

Jan 2026 – Present

- Improved reliability of a production classification service by resolving OOM issues, reducing memory usage by **61%** and eliminating memory leaks
- Worked across distributed systems and event-driven infrastructure using Kafka, Pub/Sub, and queue-based workflows
- Redesigned CI workflows and automated resilient release processes, improving deployment confidence and reducing operational friction
- Improved maintainability by refactoring core code to use generic typing and migrating to modern Python packaging standards (Poetry 2.x)
- Fixed broken automation (Dependabot) and contributed upstream improvements to open-source tooling for dependency parsing and license detection

Senior Software Engineer • Capital One • Remote

Dec 2022 - Dec 2025

- Served as primary point of contact for a large-scale internal talent platform, leading engineering operations, reliability, and cross-team coordination
- Designed and built internal tooling including a job listing Slack bot and asynchronous workflows using AWS Lambda, Python, and queue-based architectures
- Managed bug triage, technical debt, and on-call rotations, ensuring system stability and rapid incident response
- Mentored junior engineers and improved code quality through reviews and technical guidance
- Partnered cross-functionally with product, HR, and compliance to scope and deliver improvements to internal tools

Software Engineer (Contract) • Promptworks • Remote

Aug 2022 - Nov 2022

- Implemented Redis caching in a Django application to improve performance
- Designed and built webhook integrations for real-time customer notifications
- Collaborated directly with clients to define scope and deliver production features

Technical Mentor • Hack Reactor • Remote

Oct 2020 - Jan 2022

Taught full-stack web development (React, Node, SQL) to adult career-switching students

Software Engineer • The Mobility House • Austin, TX

Dec 2019 - Oct 2020

Built Django-based tools for EV charging and grid management systems

Research Software Engineer • RAND Corporation • Santa Monica, CA

Nov 2018 - Nov 2019

Developed full-stack applications (React, Django) and AWS-based tools for research teams

Software Developer • TechEmpower • El Segundo, CA

Oct 2015 - Oct 2018

Built internal tools in Java for workflow automation and dynamic form generation

Education

M.Sc. Computer Science, Georgia Institute of Technology, GPA 4.0

2017 - 2022

B.A. Peace, War and Defense, Minor in Computer Science, UNC Chapel Hill

2010 - 2014
